## HS® gear damper

### Surprisingly original: details which please...

HAUTAU ATRIUM HS® is a product line with pioneering technical innovations for lift and slide systems. The HAUTAU HS® gear damper is a newly developed product and international highlight of this range. It regulates handle operation, so that the handle smoothly slides precisely back into its locked position in a controlled way almost of its own accord.

## comfort close

HAUTAU ATRIUM  
comfort close

If you are looking for a gentle, precise solution, the HAUTAU ATRIUM comfort close system is the champion among automatic window locking systems, offering reliability and convenience.

All it requires is a gentle push for precise, airtight closure even with heavy lift and slide or slide-only systems. At a hand width away from the closing edge, the sash brakes gently and is automatically drawn into the closed position safely, securely, easily and comfortably.

The HAUTAU ATRIUM comfort close system can be fitted into almost any lift and slide or slide-only systems irrespective of the frame material. Thanks to the system's slim design. A surface-mounted version ensures the system can also be retrofit at a later date.

Manufacturers and developers benefit from this added value. HAUTAU high tech defines leading standards and is synonymous with a long-lasting quality service life and features which enthrall.

## Made in Germany

Based on experience, creativity and up-to-date expertise, HAUTAU's engineering skills set benchmarks worldwide and define technical standards for perfection in fitting systems and building automation for windows and façades.

German-made also means that manufacturers, customers and partners all benefit from a single perfect service. You can count on expertise, friendly customer care and hassle-free handling of all matters which you ask us to deal with.
